DASH0 CHALLENGE · THINC! MUNICH

HomeSweetHome

Moves your **Datadog dashboards and alerts** to **Dash0**.

THE PROMISE

“We make it as easy to leave Dash0 as it is to join Dash0.”

Mirko Novakovic, founder of Dash0

THE REALITY, COMING FROM DATADOG

“Rebuilding dashboards and alerts is typically the longest phase…”

Dash0's own Datadog migration guide

Leaving Dash0 is easy. We make joining just as easy.

OBSERVABILITY

Observability means collecting data from your software,
so engineers see what's happening and get alerted when it breaks.

logs

what happened

metrics

how much, how fast

traces

where time goes

A ~$12B market, led by Datadog.

Market size: Dash0 founder's 2024 estimate

THE GAP

Joining Dash0 from Datadog still means rebuilding dashboards and alerts.

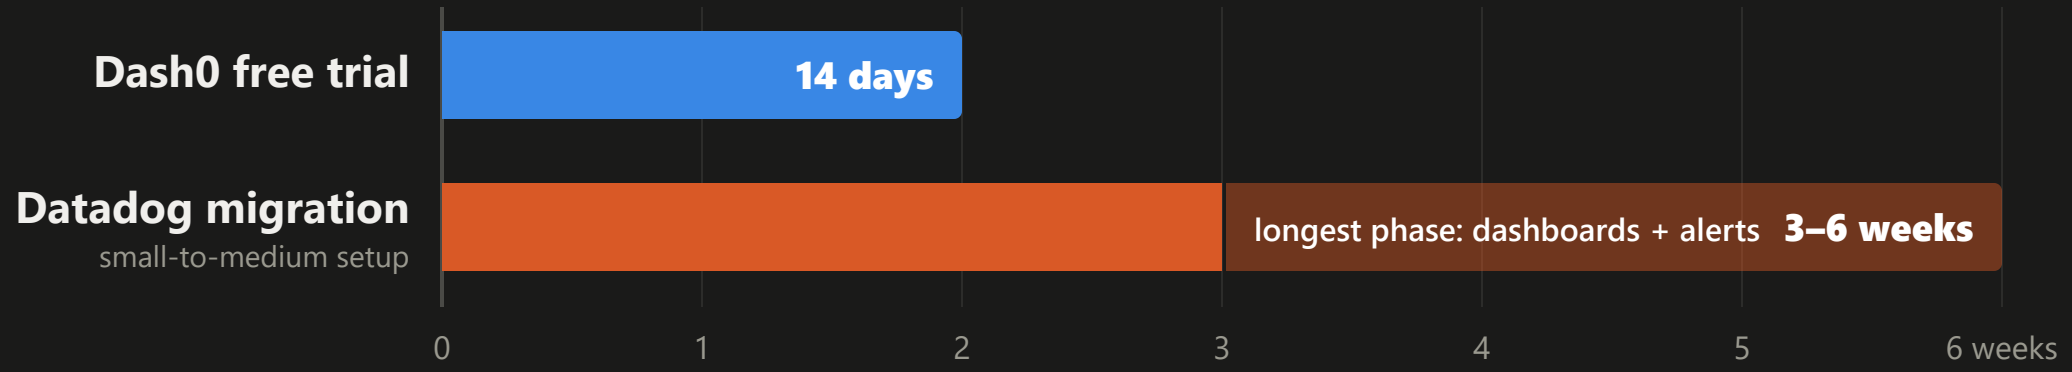

"Can I import my Datadog dashboards?"

"Not directly."

dash0.com, Datadog alternative page

Competitors already offer Datadog importers

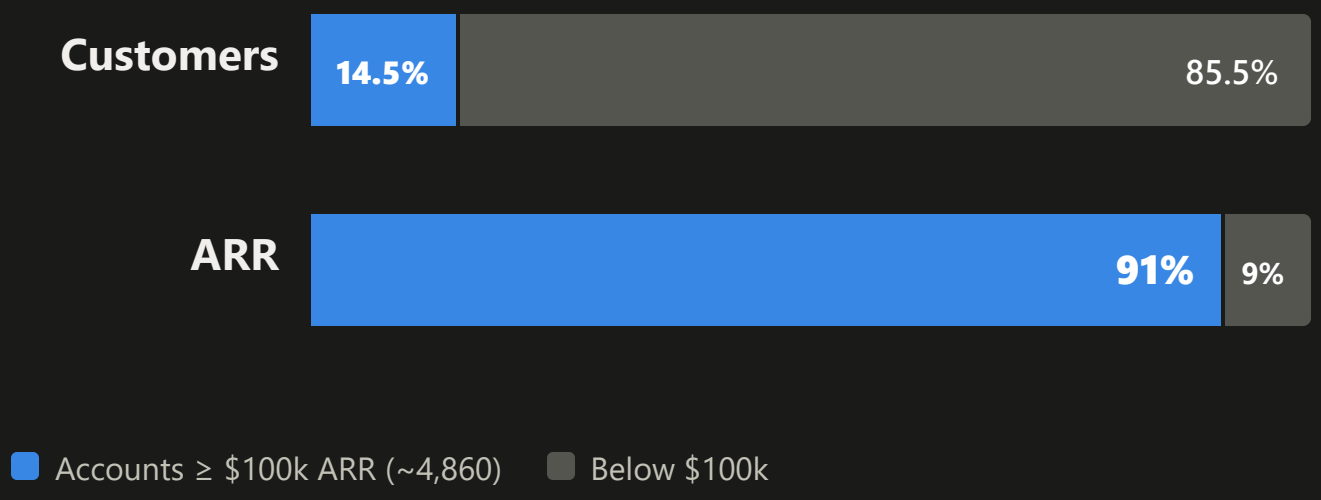

groundcover · Elastic · Chronosphere · SigNoz beta

Sources: dash0.com Datadog alternative page, pricing page, Datadog migration guide (Jul 2026), vendor docs

Datadog revenue is already moving. Most of it sits in large accounts.

DATADOG: SHARE OF CUSTOMERS VS SHARE OF ARR

$90–225M

of Datadog revenue lost each year to cancellations and downsizing

37%

of practitioners turning to OpenTelemetry cite "the freedom to switch vendors"

Datadog Q3 2026 8-K + earnings call (retention mid-to-high 90s on ~$4.5B) · Grafana Labs Observability Survey, Mar 2026 (n=1,363)

HOW IT WORKS

It works like a careful translator: it understands first, then translates.

1

Read

Takes your Datadog export: dashboards and monitors

→

2

Understand

Looks up what every metric means in Datadog's own catalogue

→

3

Translate

Rewrites it in Dash0's open formats: Perses + PromQL

→

4

Check & import

Gives every item a verdict, then loads it into Dash0

Fixed rules, no AI guessing. Same input, same result.

Clear report. Every chart and alert gets a status.

UNDER THE HOOD

Every item gets a verdict. Nothing is guessed.
